Table of Contents Volume 176, 1988

Number 1

E. Bartnik, A. Sievers: In-vivo observations of a spherical aggregate of endoplasmic reticulum and of Golgi vesicles in the tip of fast-growing *Chara* rhizoids 1

B.D. Kishinevsky, I.J. Law, B.W. Strijdom: Detection of lectins in nodulated peanut and soybean plants 10

I.J. Law, T. Haylett, B.W. Strijdom: Differences in properties of peanut seed lectin and purified galactose- and mannose-binding lectins from nodules of peanut 19

E. Krämer, R. Tischner, A. Schmidt: Regulation of assimilatory nitrate reduction at the level of nitrite in *Chlorella fusca* 28

B. Dumas, M. Legrand, P. Geoffroy, B. Fritig: Purification of tobacco O-methyltransferase by affinity chromatography and estimation of the rate of synthesis of the enzymes during hypersensitive reaction to virus infection 36

A.C. Borstlap, J. Schuurmans: Kinetics of L-valine uptake in tobacco leaf discs. Comparison of wildtype, the digenic mutant Val^r-2, and its monogenic derivatives 42

B. Hause, C. Wasternack: Compartmentation of uridine 5′-triphosphate occurs during synthesis of cytoplasmic and mitochondrial ribosomal RNAs of cultured tomato cells but not during synthesis of cytoplasmic ribosomal and transfer RNAs 51

S.S. Virk, R.E. Cleland: Calcium and the mechanical properties of soybean hypocotyl cell walls: Possible role of calcium and protons in cell-wall loosening 60

H. Rennenberg, A. Polle, N. Martini, B. Thoene: Interaction of sulfate and glutathione transport in cultured tobacco cells 68

J.E. Parker, K. Hahlbrock, D. Scheel: Different cell-wall components from *Phytophthora megasperma* f. sp. *glycinea* elicit phytoalexin production in soybean and parsley 75

A. Ehmke, K. von Borstel, T. Hartmann: Alkaloid N-oxides as transport and vacuolar storage compounds of pyrrolizidine alkaloids in *Senecio vulgaris* L. 83

N.H. Battey, M.A. Venis: Calcium-dependent protein kinase from apple fruit membranes is calmodulin-independent but has calmodulin-like properties 91

E.A.C. MacRobbie, J. Banfield: Calcium influx at the plasmalemma of *Chara corallina* 98

D.J. Cosgrove: Mechanism of rapid suppression of cell expansion in cucumber hypocotyls after blue-light irradiation 109

R.C. Leegood, C.A. Labate, S.C. Huber, H.E. Neuhaus, M. Stitt: Phosphate sequestration by glycerol and its effects on photosynthetic carbon assimilation by leaves 117

P.R. Shewry, S. Parmar, B. Buxton, M.D. Gale, C.J. Liu, J. Hejgaard, M. Kreis: Multiple molecular forms of β-amylase in seeds and vegetative tissues of barley 127

Short communication

K. Denzel, G. Schilling, G.G. Gross: Biosynthesis of gallotannins. Enzymatic conversion of 1,6-digalloylglucose to 1,2,6-trigalloylglucose 135

Number 2

R.M. Benito Moreno, F. Macke, A. Alwen, E. Heberle-Bors: In-situ seed production after pollination with in-vitro-matured, isolated pollen 145

C. Sautter, E. Sautter, B. Hock: Import of peroxisomal hydroxypyruvate reductase into glyoxysomes 149

A.J.E. van Bel, W.J.P. van Kesteren, C. Papenhuijzen: Ultrastructural indications for coexistence of symplastic and apoplastic phloem loading in *Commelina benghalensis* leaves. Differences in ontogenic development, spatial arrangement and symplastic connections of the two sieve tubes in the minor vein 159

W.T. Kim, V.R. Franceschi, H.B. Krishnan, T.W. Okita: Formation of wheat protein bodies: Involvement of the Golgi apparatus in gliadin transport 173

M. Iino: Desensitization by red and blue light of phototropism in maize coleoptiles 183

B. Steinitz, T. Best, K.L. Poff: Phototropic fluence-response relations for *Avena* coleoptiles on a clinostat 189

S.C. de Vries, H. Booij, P. Meyerink, G. Huisman, H.D. Wilde, T.L. Thomas, A. van Kammen: Acquisition of embryogenic potential in carrot cell-suspension cultures 196

H.D. Wilde, W.S. Nelson, H. Booij, S.C. de Vries, T.L. Thomas: Gene-expression programs in embryogenic and non-embryogenic carrot cultures 205

P. Kunzelmann, M. Iino, E. Schäfer: Phototropism of maize coleoptiles. Influences of light gradients 212

D. Barber, G.G. Limas, J.G. Gavilanes, E. Méndez: Isolation and characterization of thirteen new salt-soluble proteins from barley by reversed-phase high-performance liquid chromatography 221

B.A. McGaw, R. Horgan, J.K. Heald, G.J. Wullems, R.A. Schilperoort: Mass-spectrometric quantitation of cytokinins in tobacco crown-gall tumours induced by mutated octopine Ti plasmids of *Agrobacterium tumefaciens* 230

R. Behl, R. Tischner, K. Raschke: Induction of a high-capacity nitrate-uptake mechanism in barley roots prompted by nitrate uptake through a constitutive low-capacity mechanism 235

F. Mueller-Uri, B. Parthier, L. Nover: Jasmonate-induced alteration of gene expression in barley leaf segments analyzed by in-vivo and in-vitro protein synthesis 241

H. Felle: Cytoplasmic free calcium in *Riccia fluitans* L. and *Zea mays* L.: Interaction of Ca^{2+} and pH? 248

D.F. Sültemeyer, G. Klöck, K. Kreuzberg, H.P. Fock: Photosynthesis and apparent affinity for dissolved inorganic carbon by cells and chloroplasts of *Chlamydomonas reinhardtii* grown at high and low CO_2 concentrations 256

U.W. Kümmel, K. Brinkmann: The oxidation of exogenous NADH by mitochondria of *Euglena gracilis* 261

W. Laing, K. Kreuz, K. Apel: Light-dependent, but phytochrome-independent, translational control of the accumulation of the P700 chlorophyll-a protein of photosystem I in barley (*Hordeum vulgare* L.) 269

J.J. Casal, H. Smith: The loci of perception for phytochrome control of internode growth in light-grown mustard: Promotion by low phytochrome photoequilibria in the internode is enhanced by blue light perceived by the leaves 277

Short communication

S.A. Briars, F. Kessler, D.E. Evans: The calmodulin-stimulated ATPase of maize coleoptiles is a 140000-M_r polypeptide 283

Number 3

B. Galatis: Microtubules and epithem-cell morphogenesis in hydathodes of *Pilea cadierei* 287

J.L. Jones, J.A. Callow, J.R. Green: Monoclonal antibodies

to sperm surface antigens of the brown alga *Fucus serratus* exhibit region-, gamete-, species- and genus-preferential binding 298

B. Ding, M.V. Parthasarathy, K. Niklas, R. Turgeon: A morphometric analysis of the phloem-unloading pathway in developing tobacco leaves 307

E.B. Braun-Howland, P. Lindblad, S.A. Nierzwicki-Bauer, B. Bergman: Dinitrogenase reductase (Fe-protein) of nitrogenase in the cyanobacterial symbionts of three *Azolla* species: Localization and sequence of appearance during heterocyst differentiation 319

W. Zimmer, K. Roeben, H. Bothe: An alternative explanation for plant growth promotion by bacteria of the genus *Azospirillum* 333

M. Thein, W. Michalke: Bisulfite interacts with binding sites of the auxin-transport inhibitor N-1-naphthylphthalamic acid 343

K.H. Vanselow, H. Dau, U.-P. Hansen: Indication of transthylakoid proton-fluxes in *Aegopodium podagraria* L. by light-induced changes of plasmalemma potential, chlorophyll fluorescence and light-scattering 351

K.-J. Dietz, G. Kaiser, E. Martinoia: Characterization of vacuolar polypeptides of barley mesophyll cells by two-dimensional gel electrophoresis and by their affinity to lectins 362

D.S. Bush, R. Hedrich, J.I. Schroeder, R.L. Jones: Channel-mediated K^+ flux in barley aleurone protoplasts 368

U. Homeyer, G. Schultz: Transport of phenylalanine into vacuoles isolated from barley mesophyll protoplasts 378

R. Brödenfeldt, H. Mohr: Time courses for phytochrome-induced enzyme levels in phenylpropanoid metabolism (phenylalanine ammonia-lyase, naringenin-chalcone synthase) compared with time courses for phytochrome-mediated end-product accumulation (anthocyanin, quercetin) 383

D.R. Keiller, G.C. Whitelam, H. Smith: Polyclonal antibodies raised to phycocyanins contain components specific for the red-absorbing form of phytochrome 391

J. Pritchard, R.G.W. Jones, A.D. Tomos: Control of wheat root growth. The effects of excision on growth, wall rheology and root anatomy 399

N.V. Raikhel, S.Y. Bednarek, T.A. Wilkins: Cell-type-specific expression of a wheat-germ agglutinin gene in embryos and young seedlings of *Triticum aestivum* 406

T.D. Sharkey, J.A. Berry, R.F. Sage: Regulation of photosynthetic electron-transport in *Phaseolus vulgaris* L., as determined by room-temperature chlorophyll *a* fluorescence 415

Number 4

R.D. Record, L.R. Griffing: Convergence of the endocytic and lysosomal pathways in soybean protoplasts 425

R.T. Furbank: Regulation of electron transport in maize mesophyll chloroplasts: The relationship between chlorophyll *a* fluorescence quenching and O_2 evolution 433

B.C. Monk: The cell wall of *Chlamydomonas reinhardtii* gametes: Composition, structure and autolysin-mediated shedding and dissolution 441

A.J. Pope, R.A. Leigh: The use of a chloride-sensitive fluorescent probe to measure chloride transport in isolated tonoplast vesicles 451

J.S. Pate, P. Lindblad, C.A. Atkins: Pathways of assimilation and transfer of fixed nitrogen in coralloid roots of cycad-*Nostoc* symbioses 461

G. Key, E.W. Weiler: Monoclonal antibodies identify common and differentiation-specific antigens on the plasma membrane of guard cells of *Vicia faba* L. 472

D. Southworth, M.B. Singh, T. Hough, I.J. Smart, P. Taylor, R.B. Knox: Antibodies to pollen exines 482

J. Soll, I. Fischer, K. Keegstra: A guanosine 5′-triphosphate-dependent protein kinase is localized in the outer envelope membrane of pea chloroplasts 488

J.P. Stafstrom, I.M. Sussex: Patterns of protein synthesis in dormant and growing vegetative buds of pea 497

I. Löhden, M. Frentzen: Role of plastidial acyl-acyl carrier protein: Glycerol 3-phosphate acyltransferase and acyl-acyl carrier protein hydrolase in channelling the acyl flux through the prokaryotic and eukaryotic pathway 506

T. Björkman, R.E. Cleland: The role of the epidermis and cortex in gravitropic curvature of maize roots 513

R.M. Napier, M.A. Venis, M.A. Bolton, L.I. Richardson, G.W. Butcher: Preparation and characterisation of monoclonal and polyclonal antibodies to maize membrane auxin-binding protein 519

S. Rawsthorne, C.M. Hylton, A.M. Smith, H.W. Woolhouse: Distribution of photorespiratory enzymes between bundle-sheath and mesophyll cells in leaves of the C_3–C_4 intermediate species *Moricandia arvensis* (L.) DC 527

K.J. Oparka, D.A.M. Prior: Movement of Lucifer Yellow CH in potato tuber storage tissues: A comparison of symplastic and apoplastic transport 533

K.J. Oparka, D. Robinson, D.A.M. Prior, P. Derrick, K.M. Wright: Uptake of Lucifer Yellow CH into intact barley roots: Evidence for fluid-phase endocytosis 541

Short communication

H. Gut, P. Matile: Apparent induction of key enzymes of the glyoxylic acid cycle in senescent barley leaves 548
